Here are some common keyboard shortcuts for creating and managing cells in Jupyter Notebook:

❖ **Run Codes:** Shift + Enter!

❖ **Creating New Cells**

1. Create a new cell below the current cell:

- Press ``B`` in Command mode.

2. Create a new cell above the current cell:

- Press ``A`` in Command mode.

❖ **Command Mode vs. Edit Mode**

- **Command mode** is where you can edit the notebook structure (add/delete cells, etc.).

- **Edit mode** is where you can edit the content of a cell.

❖ **You can toggle between Command mode and Edit mode:**

- **Command mode:** Press ``Esc`` (you will see a blue left margin).

- **Edit mode:** Press ``Enter`` (you will see a green left margin).

❖ **Other Useful Keyboard Shortcuts:**

- **Switch to Command mode:** Press ``Esc``.

- **Switch to Edit mode:** Press ``Enter``.

- **Run the current cell and move to the next cell:** Press ``Shift + Enter``.

- **Run the current cell and insert a new cell below:** Press ``Alt + Enter``.

- **Delete the current cell:** Press ``D`` twice (``D, D``) in Command mode.

- **Cut the current cell:** Press ``X`` in Command mode.

- **Copy the current cell:** Press ``C`` in Command mode.

- **Paste the cell below:** Press ``V`` in Command mode.

- **Undo the last cell deletion:** Press ``Z`` in Command mode.
